About Call for Sites

The Local Plan will need to allocate sites for new homes, jobs, and potentially supporting infrastructure.

What's happened so far

Our Local Plan 'Call For Sites' took place between November 2024 and January 2025.

626 sites were put forward, for various uses, including: residential, commercial, renewable energy and green spaces.

Of course, this is just the total number of sites that have been put forward for consideration and the Council has not yet conducted all the analysis which will be required before a view can be taken on which of these sites are suitable for the proposed use.

41%

which sites they would prefer to see developed in their area. You do not need to comment on every site across Central Bedfordshire.

Your views will be considered alongside detailed evidence, national policy and environmental information before any decisions are made about which sites may be suitable to take forward.

The consultation opens on 6 July 2026 and closes on 17 August 2026.

Planning applications

This consultation is separate from the planning application process.

Some submitted sites may already be the subject of planning applications, but comments made through this consultation will only be considered as part of preparing the new Local Plan.

If you want to comment on a planning application, you must do so through the separate planning application process.

How to take part

Strategic Environmental Assessment (SEA) Scoping Report

Alongside the sites consultation, we are also consulting on the Strategic Environmental Assessment (SEA) Scoping Report.

This report is a technical document that helps set out the issues that will need to be considered to assess the potential environmental impacts of the Local Plan as it develops. Feedback on the SEA Scoping Report will help inform the wider preparation of the Local Plan.

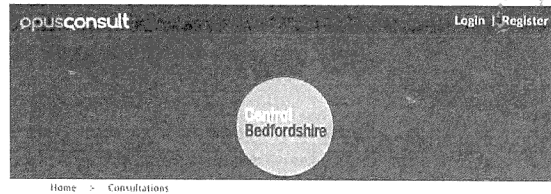

The consultation opens on 6 July 2026 and closes on 20 July 2026

The proposed use sets out what type of development the site is being promoted for. Where 'other' is listed alongside a specified use, this can refer to facilities such as schools, community buildings and other supporting infrastructure.
